HUSSEIN ARAJI

Ottawa, ON | 613-600-4768 | HusseinAraji@cmail.carleton.ca

EDUCATION

Bachelor of Computer Science, Artificial Intelligence and Machine Learning Stream, Co-op Option **2023-Present**

Carleton University, Ottawa, ON

- Second-year standing with a cumulative GPA of 9.00/12 (B+)
- Expected graduation: September 2028

AVAILABILITY

Available for a 4-month co-op work term beginning May 2027

RELEVANT SKILLS, EXPERIENCES AND ACCOMPLISHMENTS

Technical and Analytical Skills

- Developed and debugged Java programs in COMP 2402 using data structures, file input/output, and algorithm analysis to improve program correctness and efficiency
- Built and tested C programs in COMP 2401 on a Linux virtual machine, using functions, arrays, pointers, GCC, Make, and command-line tools to complete systems-programming tasks
- Analyzed algorithm efficiency with Big-O notation and compared approaches such as sorting and searching to understand how data structure choices affect runtime
- Used Windows and Linux environments with VirtualBox, SSH/SFTP, javac/java, GCC, and provided test files to compile, run, troubleshoot, and verify coursework

Communication and Teamwork Skills

- Explained technical steps and documented program setup in README files and assignment notes so work could be followed and tested more easily
- Communicated with customers and coworkers in fast-paced retail environments, resolving questions and keeping tasks moving during busy shifts
- Balanced full-time coursework with part-time work responsibilities by organizing deadlines and completing assignments, projects, and work tasks on schedule

APPLIED PROJECTS

Tracking Equipment Program | COMP 2401 - Introduction to Systems Programming, Carleton University **Oct 2026**

- Developed a C program to validate hunters and equipment, initialize records, reserve and return equipment, and print reservation information for a course assignment
- Compiled and tested the program in Linux using GCC, Make, and the provided tester, then debugged individual functions until the required tests passed
- Organized the solution into separate functions and documented the program in a README, making the code easier to test, understand, and maintain

Data Structures and Algorithms Assignment | COMP 2402 - Abstract Data Types and Algorithms, Carleton University **Sep-Oct 2026**

- Implemented Java solutions that processed input files and used collections and data structures to solve multiple assignment tasks
- Tested programs with local input/output files and adjusted implementations after identifying incorrect output and performance issues
- Applied runtime analysis and course concepts such as sorting, sets, and algorithm efficiency to choose more effective solutions for larger inputs

HUSSEIN ARAJI

WORK EXPERIENCE

Front Store Supervisor | Shoppers Drug Mart, Ottawa, ON **2024-2026**

- Supervised daily front-store activities, supported staff, handled cash, and responded to customer concerns to keep shifts organized and service running smoothly
- Trained and assisted team members with store procedures and customer service, helping maintain consistent service during busy periods
- Prioritized several responsibilities at once, including customer support, stocking, and closing tasks, while maintaining attention to accuracy and store standards

Data Entry Clerk | Capital Pro Taxes Inc., Ottawa, ON **2024-2026**

- Entered and updated client information in databases while checking records for accuracy and completeness to support reliable office records
- Reviewed information carefully and followed data-handling procedures to protect confidential client information and reduce entry errors
- Organized digital records and retrieved information for staff, helping keep files current and easier to access

OMNI Customer Fulfillment Associate | Walmart, Ottawa, ON **2022-2023**

- Picked and packed online customer orders accurately, checking product details and substitutions to support timely order fulfillment
- Coordinated with coworkers across store departments to locate items and complete orders in a fast-paced environment
- Assisted customers with order questions and product locations, using clear communication to solve issues and support a positive experience

TECHNICAL TOOLS AND KNOWLEDGE

Programming	Java, C, Python fundamentals
Operating Systems	Linux, Windows
Development Tools	GCC, Make, javac/java, VirtualBox, SSH/SFTP
Computer Science	Object-oriented programming, data structures, algorithms, Big-O analysis, testing and debugging, pointers and memory fundamentals

LANGUAGES

English - fluent | Arabic - fluent | French - beginner

RECORD OF GRADES

Student Name:	Hussein Araji
Degree Program and Year Standing:	Bachelor of Computer Science - Second Year Standing
Degree Stream:	Artificial Intelligence and Machine Learning
University:	Carleton University
Cumulative Grade Point Average:	9.00/12 (B+)
Number of Academic (4 month) Terms Completed:	6
Co-op (4 Month) Work Terms Completed:	0
Expected Graduation Date:	September 2028

Course Number	Course Name	Letter Grade
1000-Level Courses		
COMP 1005	Introduction to Computer Science I	B-
COMP 1006	Introduction to Computer Science II	C-
MATH 1007	Elementary Calculus I	C-
MATH 1107	Linear Algebra I	C
BIOL 1010	Biotechnology and Society	A+
BIOL 1902	Natural History	A+
CGSC 1001	Mysteries of the Mind	A-
PHYS 1007	Elementary University Physics I	A
PSYC 1001	Introduction to Psychology I	A+
PSYC 1002	Introduction to Psychology II	A
RELI 1712	Religions of South and East Asia	B+
SOWK 1002	Introduction to Social Work	B
2000/3000-Level Courses		
ANTH 3225	Special Topics in Anthropology	A
BIOL 2903	Natural History and Ecology of Ontario	A-
CGSC 2001	Theories in Cognitive Science	B
PHIL 2330	Happiness, Well-being, and the Good Life	A-
Current Courses		
COMP 1805	Discrete Structures I	In Progress
COMP 2401	Introduction to Systems Programming	In Progress
COMP 2402	Abstract Data Types and Algorithms	In Progress
RELI 2110	Judaism	In Progress
RELI 3101	Special Topics in Religions and the Body	In Progress
